

Privacy Policy of Universal Fetch

Universal Fetch respects and protects the privacy of individuals using our application and related services. This Privacy Policy outlines how we collect, use, and safeguard information when you use Universal Fetch.

1. App Functionality & Scope

Universal Fetch is a utility tool designed to help users download videos directly from web links onto their local devices. We do not host, store on external servers, or claim ownership over any video content downloaded through the app.

2. Information Collection and Usage

a. Storage & Media Access

To save downloaded video files to your device and allow you to view them within the app, Universal Fetch requests access to external storage:

- * Permissions Used: `WRITE\_EXTERNAL\_STORAGE` and `READ\_EXTERNAL\_STORAGE` (for Android 9 and below).

- * Purpose: Used strictly to write downloaded media files to your device storage and read saved files for local playback. We do not access, collect, or share your personal photos, documents, or unrelated files.

b. Internet & Network Status

- * Permissions Used: `INTERNET` and `ACCESS\_NETWORK\_STATE`.

- * Purpose: Required to establish network connections, process video URL requests, fetch video file data, and serve advertisements.

c. Background Downloads & Notifications

- * Permissions Used: `FOREGROUND\_SERVICE`, `FOREGROUND\_SERVICE\_DATA\_SYNC`, and `POST\_NOTIFICATIONS`.

- * Purpose: Enables the app to complete video downloads in the background when you navigate away from the app, displaying download progress and completion alerts via system notifications.

d. Device State & Identifiers

- * Permissions Used: `READ\_PHONE\_STATE` and `com.google.android.gms.permission.AD\_ID`.

- * Purpose: Used by third-party advertising SDKs (such as Google AdMob) and analytics tools to serve relevant ads, prevent ad fraud, and maintain service connectivity. We do not collect or store personal identity data or phone call logs.

3. Third-Party Services & Advertising

Universal Fetch uses third-party services that may collect non-personal information used to identify your device for advertising and analytical purposes:

- * Google Play Services & AdMob
- * Google Analytics for Firebase

These services collect device-specific information (such as phone model, OS version, unique advertising identifiers, and network state) according to their respective privacy policies.

4. Data Sharing and Disclosure

We do not sell, trade, or rent personal information to third parties. Non-personal device data or aggregate session data is shared only with integrated third-party ad networks and analytics platforms to support app monetization and performance stability.

5. Data Security

We implement standard technical measures to protect the integrity of the application. However, please note that no method of transmission over the internet or method of electronic storage is 100% secure.

6. Contact Us

If you have any questions, suggestions, or concerns regarding this Privacy Policy, please contact us at:

7. Changes to This Privacy Policy

We reserve the right to update or modify this Privacy Policy at any time. Any updates will be effective immediately upon posting the revised policy.
